INTRODUCTION

A solution to a defective battery or a step in the troubleshooting process.

Step 1 — Battery

- Locate the release mechanisms for the battery that are located near the ends of the battery

Step 2

- Slide the release lock on the top right hand side of the laptop to expose the orange on the left hand side of the tab.

Step 3

- Once the right battery release is unlocked, do the same for the release lock on the left side.
- Once both are unlocked, gently push the battery out of the device. It should be completely separated from the device.

To reassemble your device, follow these instructions in reverse order.
